How Big is Your Carbon Footprint?

FOR
YOUR
WORLD

Scan the QR code to discover the size of your individual carbon footprint in WWF's 3 minute survey!

Addingham Environment Group encourages the use of the WWF's Carbon Footprint Calculator to measure & monitor how as a village we perform. It really is an easy & quick way to see your individual score & learn more ways of reducing your footprint size.

The individual target figure for 2021 is 10.5 tonnes (tCO₂e). Can you beat it?

When you've completed the quiz, please forward a copy of your result to aeg@addingham.info. Your figure will then form part of the overall village calculation; the more participants we have, the better. Your

Zero Carbon Addingham

How Big a Truck do I need for my Carbon Footprint?

Scan the QR code to discover the size of your individual carbon footprint in WWF's 3 minute survey!

The individual target carbon footprint figure for 2021 is 10.5 tonnes (tCO₂e).

The 18t tonne vehicle above can carry a 10.5 tonne load.

Alternatively, you could fill about 660,000 children's balloons!

Try the World Wildlife Fund's survey to discover your carbon footprint & share your answer with us at aeg@addingham.info so we can calculate how Addingham performs as a village.
