

# Electric Vehicle Charging

Scan the QR code to discover more about home charging.

***Electric vehicle charging is becoming simpler with an increasing number of householders installing their own charging units. This Mini charges more quickly than others on a home charger; generally a full charge on a 7kW unit like this one would take up to 8 hours.***

**Mini facts (manufacturer's data):**

**145 mile range on a full battery.**

**4.05p per mile cost (cheaper & less emissions with solar power).**

**8 year or 100,000 mile battery warranty.**

**3 hours 12 minutes full charge time.**
