

Wildlife Friendly Addingham

School Woodland

[Click here](#) to find out more about the work AEG volunteers have been doing.

Want to get involved? We have regular work parties on Saturday mornings, working on lots of different projects. Check our facebook page or email: aeg@addingham.info

The woodland around the school grounds was planted along the line of the old railway, after the Middle School opened in 1979. Children at the school helped with the planting. If you were a pupil at the time perhaps you remember planting a tree?

The Environment Group is working with Addingham Primary School to improve and create habitats for wildlife and learning, in and around the school grounds, as part of the school's 'Green Heart of the Village' plan.

The woodland edge is good habitat for song birds. Listen out as you walk.

Count the new trees we've planted alongside the path as you walk up to Jack the Cat's seat.

How many different leaves can you see?

How many trees can you recognise?
